

ConnectED Bus Crosswalk K-12

Powered by  unitegps.com

Student Ridership & Parent App

Prevents students from boarding the wrong bus, dropped at the wrong stop, or being left behind at the end of a route with Stop Check solution.

- Supports NFC cards and touchscreen
- Live student status on mobile app
- Military-grade tablet with built-in reader

GPS & Route Optimization

Efficient, easy-to-use route optimization.

- Identify student homes, create zones, create stops
- Create rules to manage operating costs and efficiency
- Publish and share routes with drivers

Turn-by-turn Directions

Share current routes, stops and names of students assigned to stop with bus drivers via live map.

- Share routes, stops, and student assignments with drivers
- Avoid wrong bus and stop errors
- Provide drivers the information they need to succeed

Field Trip Management

Improve the efficiency of your field trips with our end-to-end field trip manager.

- Empower your district with online request capability
- Automate and speed approval process
- Assign bus, driver and share the live map with your school community

Pre & Post Trip Inspections

Pre- and post-trip inspections allow you to keep track of any issues or defects easily.

- Follow your state's trip inspection guidelines
- Mechanical and other issues shared in real-time with mechanical staff
- Inspection sheets automatically saved to the cloud

School Information System Integration

Integrate your existing school information system with UniteGPS.

- Keeps in sync with School Information System
- Eliminates manual rework
- Daily automated data feed
